## Sectors, Industry Groups & Leadership Stocks

*With 1 hour and 15 minutes until the close yesterday, all the major markets made new yearly lows. Ten minutes later, The “Plunge Protection Team” started buying massive amounts of S&P 500 call options. Buying and short-covering quickly followed into the close. This is what I warned could happen in Sunday’s newsletter. The Presidents Working Group on Financial Markets may have worked their market manipulation magic again. The PPT is very market savvy and knows the most significant impact levels. They timed it very well yesterday. If the NASDAQ market gives a 30-minute buy signal after the FOMC meeting tomorrow, I will advise selling the SQQQ position until the Fed-induced market rally is ended.*

*If the market rallies on the Fed announcement, a subgroup from the Computer Software Security industry group has already given a buy signal and is waiting for better market conditions. The subgroup is **Background Check Security Software**. Two IPOs in the group are ready to break out **HireRight Holdings Corporation (HRT)** and **Sterling Check Corp. (STER)**. I highlight HireRight Holdings in this report and Sterling Check in the weekend report.*

*I am still waiting for the **United States Oil Fund ETF (USO)** to confirm a buy signal. Wait for my confirmation text! The chart has based on substantial accumulation since oil topped out on March 8, 2022. The ETF has not given a sell signal during the formation of an impressive wedge that is tightening like a coiled spring. The ETF found support at the 50-day MA and Fibonacci 75.27 support Monday morning. It traded in a tight range today.*

***Dry Bulk shipping vessel** stocks may have run out of steam as they continue to base from their massive move higher, but the LNG shippers look strong. **SEACOR Marine Holdings Inc. (SMHI)** is a leader in the **Oil & LNG Shipping Vessels** industry group that is ready to move higher after a one-month pause. It is a feature stock in this report.*

## Sectors, Industry Groups & Leadership Stocks

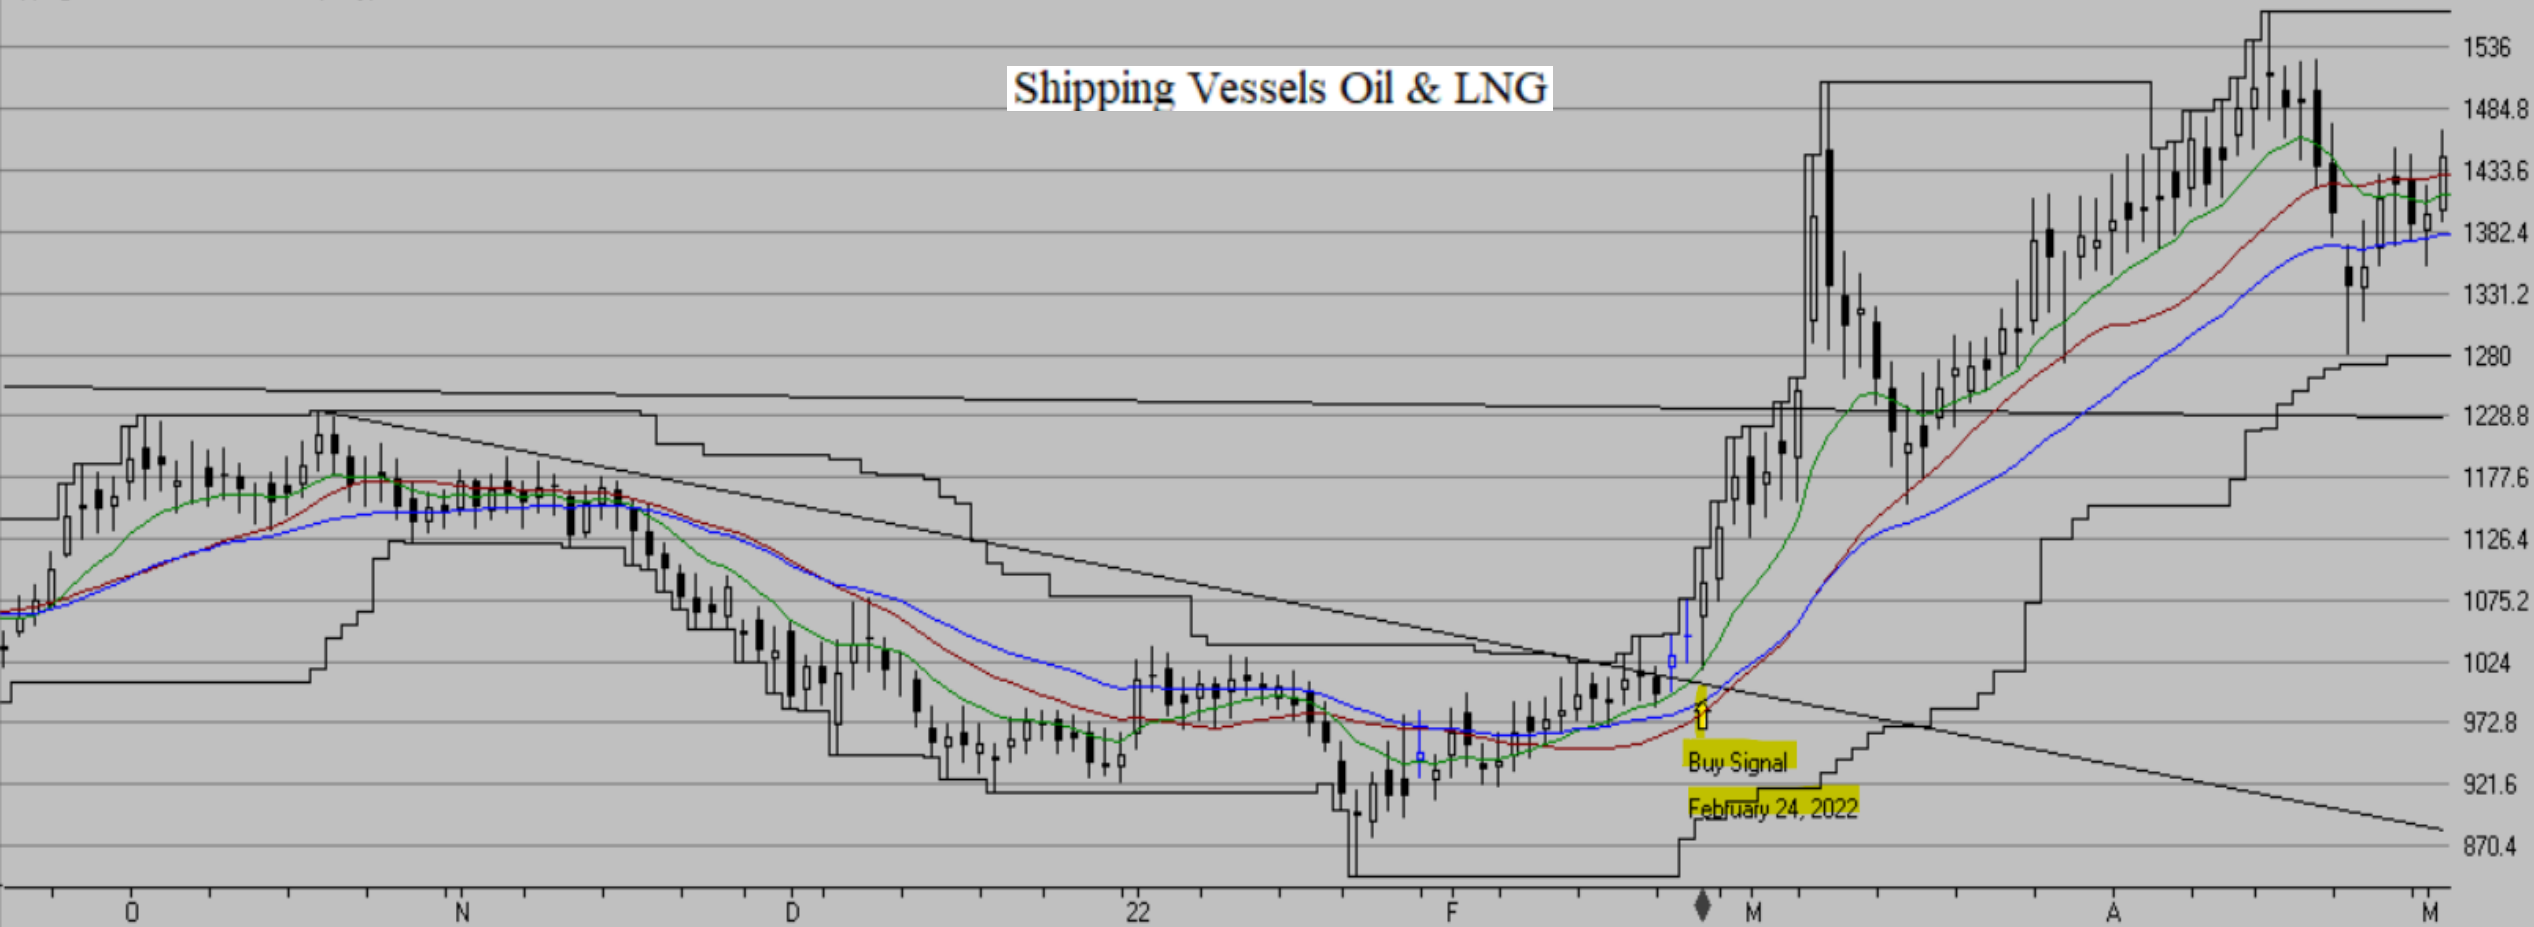

*The bears are in control of the Russell 2000 and indicate “Risk-Off” in the markets.*

**I continue to recommend caution and cash.**
